

B+LNZ GENETICS

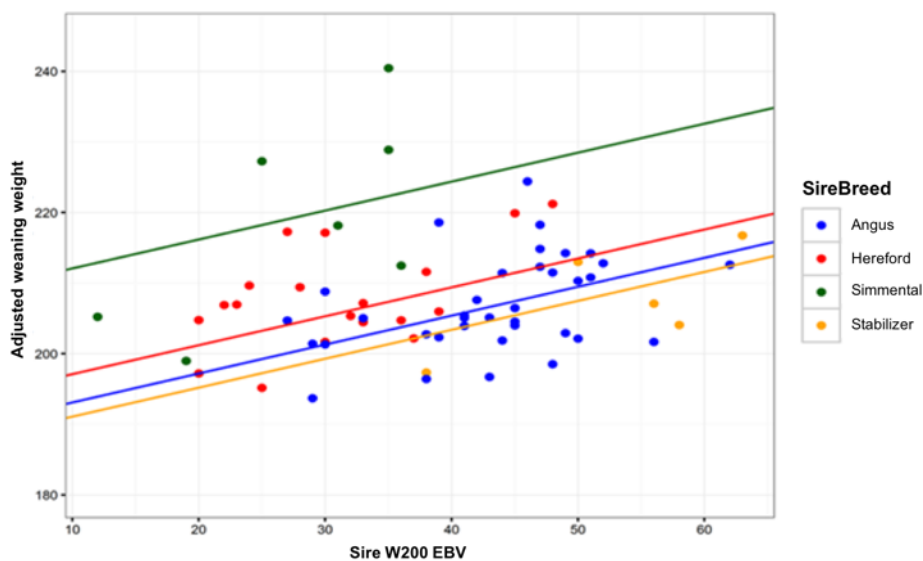

BEEF PROGENY TEST RESULTS

AUGUST 2016

1 200 Day Weight EBVs:

This graph shows progeny test bulls' 200 Day Weight (weaning) EBVs and how they matched on-farm weaning weights in their calves. When EBV goes up, so does average weaning weight. This was the case for all bulls, across all breeds.

2 Artificial insemination success rates across the five properties:

FARM	2014/15	2015/16
Whangara	44%	56%
Rangitaiki	56% R2 heifers, 64% MA cows	64%
Tautane	49%	58%
Mendip Hills	42%	49%
Caberfeidh	56% R2 heifers	62% R3s

3 Body condition score versus pregnancy rates:
