

B+LNZ GENETICS

DAIRY-BEEF

PROGENY TEST SIRES

The Dairy Beef Progeny Test is run on Pāmu farms at Wairakei Estate near Taupo. This programme, which is co-funded by LIC, aims to improve the quality of dairy beef calves in the industry by identifying and enabling widespread use of superior bulls for dairy beef. Top bulls can be used in AB programmes in the dairy industry and in breeding programmes to generate good bulls for use over dairy cows.
